

My First Literate Document

Yoann Padioleau

December 6, 2008

1 Overview

Here is the organization of the code:

```
??  < * ?? > ≡  
    < defX ?? >  
    < defY ?? >  
    < defSet ?? >  
    < defMain ?? >
```

2 Main

The main code:

```
??  < defMain ?? > ≡                                     (? 0—1)  
    let main =  
    Printf.printf ("%d\n" x + y)
```

3 Sec1

First definition.

```
??  < defX ?? > ≡                                         (? 0—1)  
    let x = 1
```

4 Sec2

Second definition

```
??  < defY ?? > ≡                                         (? 0—1)  
    let y = 2
```

5 Sec3

Here are a set of definitions.

??	$\langle defSet ?? \rangle \equiv$ let z = 1	$(? 0 \text{---} 1) ?? \triangleright$
??	$\langle defSet ?? \rangle + \equiv$ let z = 2	$(? 0 \text{---} 1) \triangleleft ?? \triangleright$
??	$\langle defSet ?? \rangle + \equiv$ let z = 3	$(? 0 \text{---} 1) \triangleleft ??$
